

# International Workshop on Applying Ecosystem Services for Transboundary Nature Management

13-15 June 2017

Paju-si, Gyeonggi Province, Republic of Korea

The aim of the workshop is to discuss ecosystem services approaches to manage natural capital in Northeast Asia. Furthermore, an attempt will be made to initiate potential collaboration projects with international partners for transboundary ecosystem conservation and sustainable use.

During the three-day schedule, it is expected to conclude to an International Project Proposal and to set up the Northeast Asia Collaboration Channel on Ecosystem Services for Natural Capital Management. Moreover, a trip to the Civilian Control Zone and the Jeongok Prehistoric Museum is included in the final day.
